

MUHAMMAD AYAAN SHAIKH

Software Developer

Full-stack developer with **2.5+ years of experience** building responsive UIs with **React.js** and developing scalable RESTful APIs using **Node.js** and **Express**, following **MVC architecture**.

WORK EXPERIENCE

Godrej Infotech

Dec 2025 - Present

Assistant Manager

- Design and implement responsive user interfaces using **React.js**, ensuring cross-browser compatibility and performance. Build RESTful APIs and backend services using **Node.js + Express**

Prosoft e-Solutions India Pvt. Ltd.

May 2024 - Dec 2025

Software Developer

- Built a **Express + WhatsApp Cloud API** chatbot handling **10K+ messages** per month. Integrated a secure web admin panel with role-based access control for bot configuration and management using **React.js and Express**.
- Contributed to the migration of a legacy application **C5 Cat Analyzer** to **C5 Cat Web** in **React.js and Express**, implementing **multilingual support** and enhancing user experience by 60%.
- Increased file import performance by 40% through parallel processing, optimized uploads with **express-fileupload** npm package, and state management via **Tanstack React Query**.

CodeArray Technologies Pvt. Ltd.

Jun 2023 - May 2024

Associate Software Engineer

- Implemented a role-based authentication system in **Clinicsoft web** application using **Next.js and Redux Toolkit**, ensuring secure and personalized user access.
- Created a theme selection feature in login screen, enhancing personalization and User experience.
- Enhanced and implemented entire order processing flow in **EZ Order web** using **Redux Toolkit**.
- Developed **EZ Order Admin Panel** in **Next.js** to manage Products, subscription plans etc.

PROJECTS

Career Compass Web

- Working on a full-stack job tracking web application enabling users to manage and organize their job applications from multiple platforms efficiently. Implemented secure user authentication and authorization using **JWT with Axios interceptors**, ensuring safe access control across user sessions. Built the backend using **NodeJS and Express**, with **PostgreSQL** for structured data storage and complex queries.

IOT Sense Hub

- A centralized system designed to collect, process, and analyze real-time data from multiple **IoT sensors**. Build using Javascript, Express server and MongoDB as database
